
4MW solar power plant in Cebu Philippines

Where is the Philippines' first floating solar power plant located?

Carmen Copper Corporation has officially launched the Philippines' first operating megawatt-scale floating solar power facility, located on the Malubog Reservoir within its mine site in Toledo City, Cebu. The 3-hectare facility has 8,540 floating solar panels capable of generating up to 4.99 megawatts (MW) of clean energy.

What is the Philippines' first megawatt-scale floating solar facility?

The Philippines' first megawatt-scale floating solar facility in Cebu as seen in a August 2025 handout image. MANILA, Philippines -- A floating solar power plant on a reservoir in Cebu has begun supplying energy to a copper mine, marking the country's first megawatt-scale deployment of the emerging technology.

Where is the largest solar power plant in Mindanao?

HSEC and city officials led the formal commissioning of the 25-megawatt (MW) solar power plant, which is the first in the city and considered as among the biggest in Mindanao, in its 56-hectare site in Purok Changco, Barangay Bawing.

Is the Philippines entering a new era of energy?

The Philippines is officially entering a new era of energy with a landmark 4.99 MW floating solar plant on the Malubog Reservoir in Toledo City, Cebu. The floating photovoltaic farm is a pioneering project, a collaboration between Carmen Copper Corp. and the global engineering firm Black & Veatch. It is the first of its kind in the Philippines.

The Background of Our Story In active response to the Philippines' energy transition strategy, Black & Veatch, a global leader in energy and infrastructure, has successfully completed the ...

The Philippines has successfully installed a 4.99 MW floating solar array, marking the country's first megawatt-scale floating solar facility. Located on the Malubog reservoir at a ...

Carmen Copper Corporation has officially launched the Philippines' first operating megawatt-scale floating solar power facility, located on the Malubog Reservoir within its mine ...

Recently, the energy sector in the Philippines achieved a major breakthrough as the 4.99-megawatt floating solar power station at the Malubog Reservoir in Toledo City, Cebu, ...

The plant will support the country's RE share goal of 35%. A 4.99 megawatt floating solar plant in Cebu City in the Philippines has been successfully connected to the grid.

The Philippines' first megawatt-scale floating solar power plant has been connected to the national grid. Located on the Malubog Reservoir in Cebu province, this facility with a ...

A floating solar power plant on a reservoir in Cebu has begun supplying energy to a copper

mine, marking the country's first megawatt-scale deployment of the emerging ...

The Philippines has officially connected its first megawatt-scale floating solar power plant to the national grid. The 4.99 MW facility, built on the Malubog Reservoir in Cebu ...
