Will go Enerji be made in Turkey?

Gökhan Yildiz, Chairman of GO Enerji, highlighted at a press conference that the factory will operate under the 'Made in Turkey' label, serving both domestic demand and LG Energy Solution's global customers. This includes exports to Europe, Africa, and the Middle East.

How many GWh can a battery pack produce in 2026?

These battery packs will be used in electric vehicles and stationary applications. The factory is scheduled to open as early as the second quarter of 2026 and will initially operate with a production capacity of 2.5 gigawatt-hours (GWh). Within two years, the facility's capacity is expected to increase to 7.5 GWh.

What electric vehicles are being made in Turkey?

Meanwhile, Turkey is actively fostering an ecosystem for electric vehicle manufacturing: the Ford e-Transit, the Ford e-Transit Custom, and the electric VW T7 are already being produced in the country, alongside domestic Togg vehicles. BYD also plans to manufacture electric vehicles in Turkey soon, and Hyundai will follow suit.
