
Bhutan solar container communication station distributed power generation sheet

How can Bhutan improve its energy security?

To improve Bhutan's energy security while strengthening resilience to water variation and climate change, it is required to diversify power generation sources and types, including (i) solar farms, rooftop and floating solar, and agrivoltaics; and (ii) storage and pumped storage hydropower and small hydropower. 4 H. Nagai et al. 2017.

Who owns the energy sector in Bhutan?

Bhutan's energy sector operations have separate commercial management and ownership from the government. The state-owned Druk Green Power Corporation (DGPC) owns and operates power plants while the Bhutan Power Corporation, also state-owned, performs transmission and distribution.

How much energy can a rooftop solar system generate in Bhutan?

Bhutan's estimated total energy generation potential from rooftop solar system is 3,586 MW, including specific estimates for Thimphu (789 MW) and Paro (206 MW).⁵ In Thimphu alone, there are 1,521 government buildings suitable for rooftop solar installations, with an estimated capacity of 50 MW.

What is the power scenario in Bhutan?

The power scenario in Bhutan has undergone a major shift with demand growth especially in the industrial sector outpacing capacity addition. Industrial consumption represented by high voltage consumers has been sharply increasing since 2021. This consumer category has directly increased the overall consumption of Bhutan.

Bhutan has launched its National Solar Energy Roadmap to diversify its energy sources and bolster energy security amid rising electricity demand. This landmark initiative ...

The project will support the Government of Bhutan's national priority to enhance the climate resilience of energy systems and address energy security concerns through the ...

Side distributed energy storage project Introduction: Aiming at after-meter side distributed energy storage facilities characterized by mobility, randomness and decentralization, the project ...

Description of Project Outputs Solar power generation systems installed in public infrastructure and areas Institutional capacity for solar energy development and green job ...

To improve Bhutan's energy security while strengthening resilience to water variation and climate change, it is required to diversify power generation sources and types, ...
