
Blown circuit breaker factory in Brasilia

How many people died in a blast at a factory in Brazil?

Nine people died Tuesday after an accidental blast at an explosives factory in southern Brazil, authorities said. Images released by the Parana fire department showed a huge area covered in debris after the explosion, which happened around 6:00am (0900 GMT) in the metropolitan area of state capital Curitiba.

What is a blown circuit breaker?

A blown circuit breaker is defined as a state where the protection mechanism has been activated, typically due to excessive current flow. This occurs when the electrical load exceeds the circuit's rated capacity, causing the breaker to trip and interrupt the electrical supply.
