
British container ship generator models

What is a containerised diesel generator?

A containerised diesel generator is a complete power unit housed in a modified ISO shipping container, offering long runtimes, noise control, and protection from the elements. These generators are ideal for remote sites, industrial operations, and export use, where durability and mobility are essential.

What is a shipping container generator?

Housed within standard shipping containers, these generators offer a seamless integration of the generator set and its associated equipment, providing a robust solution that combines aesthetics with functionality.

What is an ISO containerise generator unit?

A 'standard' ISO containerise generator unit denotes an installation where the original lifting points and dimensions of the intermodal container are left unchanged.

What is a BS 7671 container generator?

All wiring is designed to meet BS 7671 standards, ensuring compliance and reliability. These containers house generators in popular sizes such as 800kVA, 1000kVA, 1250kVA, 1500kVA, and up to 3000kVA -- available in 20ft, 40ft, and 45ft formats, tailored to your specific requirements. Contact us today to discuss your requirements.
