
Dakar Metro Station Uses Folding Container Automated Type

How can a freight terminal be automated?

Within a freight terminal, several processes can be automated. Container yard management has been automated for decades, using information systems to manage the stacking of inbound and outbound containers. Thus, automated yard planning allows for more effective positioning of containers and equipment to increase throughput with the same assets.

How many container terminals are automated in 2025?

As of 2025, 75 major container terminals were fully or partially automated worldwide, representing about 8.3% of all terminals. Several terminal operators show reluctance concerning automation and adopt a wait-and-see approach. The main obstacles to automation include: High and irreversible investment costs.

What are automated straddle carriers?

This implies that a container is handled automatically from the dockside to the pickup area. Thus, automated straddle carriers (AutoStrads) allow a fully automated terminal, while it would require the combination of automated guided vehicles (AGVs) and automated stacking cranes (ASCs).

Urban mobility in Dakar, Senegal, is undergoing a transformative shift through the "Dakar Pais" project, placing the city at the forefront of technological innovations in public ...

We design foldable intermodal shipping containers that exceed ISO and CSC standards, and the systems needed to fold them standing upright in bundles, safely and quickly.

Senegal is strengthening its infrastructure modernization strategy by introducing an Intelligent Transport System (ITS) aimed at easing congestion in urban centers, particularly ...
