
Democratic Republic of Congo outdoor energy storage equipment

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.

What does the GDRC do?

The GDRC has launched a program to develop the energy sector, with the aim of developing the hydroelectric sector and exploiting the power of the numerous rivers in the Congo Basin. The GDRC welcomes developers to supply power, build the transmission lines, or sell the necessary equipment.

How many people in DRC have electricity?

Despite millions of dollars of donor funding, according to the World Bank only 19 percent of the DRC's 108 million people have access to electricity - about 41 percent in urban areas and 1 percent in rural areas. The government's vision is to increase the service level to 32 percent by 2030.

What is the energy potential of the DRC?

The DRC has immense and varied energy potential, consisting of non-renewable resources, including oil, natural gas, and uranium, as well as renewable energy sources, including hydroelectric, biomass, solar, and geothermal power.
