
Emergency household six-grid solar light

Should you invest in emergency solar power?

One way you can have a backup plan as an American citizen is to invest in an emergency solar power setup. This provides a means for you to harvest the sun's power to generate at least some of your own electricity, giving energy in potentially perilous times. But there are lots of options on the market, so how do you know what's worth getting?

What are the best emergency solar companies?

Goal Zero is easily one of the most famous emergency solar companies out there. Within various ham radio forums I've frequented in the past, this company gets mentioned again and again. The Yeti 3000x is a big generator with 2,000 watt-hours.

What is SolarHome 625+?

SolarHome 625+is BioLite's first crossover product,meaning it is sold in both our outdoor and emerging markets. This system currently provides daily light and charging to millions of individuals worldwide,unified by a common need for affordable,reliable off-grid energy. How long does it take to charge the whole system?

Can the SolarHome 625+ be used in cold weather?

The SolarHome 625+is a crossover product,and it was originally designed for daily use in regions of sub-Saharan Africa where average temperatures are always above freezing. If you plan to use your SolarHome 625+in colder weather,ensure the Control Box is located indoors in a warm/temperature regulated environment.
