# Finland Energy Storage Power Station Project

Where is the largest battery energy storage system in Finland?

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy storage system (BESS) in Nivala Municipality, Northern Ostrobothnia.

Are energy storage systems a solution to Finland's energy transition?

Energy storage systems offer a solution. "This groundbreaking is an important moment for Finland's energy transition and a concrete step toward a more flexible, resilient, and decarbonized energy system," said Jussi Jyrinsalo, Senior Vice President at Fingrid.

How will a new battery energy storage system help the Finnish grid?

After the start of commercial operations in 2026, the project will contribute an important balancing function to the Finnish grid, supporting the Finnish renewable energy expansion. The groundbreaking ceremony took place in the afternoon on Monday the 26th of May on the site near Nivala where the battery energy storage system will be built.

When will the energy grid project start in Finland?

The project proponents have confirmed that the construction works will start in March 2025. The project, which is one of the largest of its kind in Finland, will provide grid services including frequency response and will be able to participate in energy trading on wholesale power markets.

It is the largest energy storage facility in use on the Finnish electricity market with an output of approximately 38 megawatts and energy of 43 megawatt hours. The completion ...

Hitachi Energy has signed a contract with Nordic Electro Power (NEPower) to provide advanced power conversion solutions for Finland's largest battery energy storage ...

Hitachi Energy's battery storage power conversion solutions are aimed to maximise system performance and strengthen the stability of Finland's grid. The scope of supply ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy ...

The project represents a significant investment in Finland's energy infrastructure, with Hitachi Energy's technology designed to maximize system performance while reinforcing the ...

Helen Ltd and Evli Fund Management Company Ltd's renewable energy fund, Evli Renewable Energy Infrastructure Fund II, have completed a major electricity storage project in ...

Why Storage Power Stations Are Stealing the Energy Spotlight Ever wondered how we'll keep the lights on when the sun isn't shining or the wind stops blowing? Enter storage ...

---

Finland's authorization of its largest battery-storage project marks a pivotal point in the renewable energy landscape. As energy stakeholders anticipate the completion of the ...

Global energy storage capacity is expected to grow sixfold by 2030 (IEA), and commitments made at COP29 underscore the critical role of storage and grid infrastructure in ...
