
Garden solar panels

Can you put solar panels on a shed?

Yes, you can put solar panels on an outbuilding or shed that's within your property. You just need to make sure that the structure is stable enough to hold the weight of several solar panels. You can find out more by visiting our page on solar panels for sheds.

How much do garden solar panels cost?

Garden solar panels function like traditional solar panels but are ground-mounted instead of roof-mounted and placed in your garden. They are typically more expensive than regular solar panels, costing approximately $\text{R}11,700$ for a 4kW system, but can help you save $\text{R}1,304$ annually on electricity costs.

Can you use solar panels in a garden?

As you can see, there are lots of ways to use solar panels in a garden. You can get anything from small, affordable solar lights, to large ground-mounted solar panel systems that can power a house. Either way, using solar panels is a great way to save on electricity bills, and lower your carbon footprint in the process.

How much do solar-powered garden lights cost?

Solar-powered garden lights usually cost between $\text{R}30$ and $\text{R}200$. Large roof-mounted solar panels cost a lot of money, and not everyone has the finances or roof-space for them. Luckily, there are lots of different ways to use solar panels in your garden, and most aren't that expensive.
