
High-Temperature Resistant Mobile Energy Storage Containers for Oil Refineries

Can a TRNSYS solar heating system be used in a refinery?

Using TRNSYS software, the proposed Parabolic Trough Collector (PTC)-based solar heating system paired with the boiler is modelled. Sensible thermal energy storage (TES) system is integrated into the refinery's process heating to handle the intermittent nature of solar energy.

Why should you choose TEC's crude oil & HFO storage tank?

With optional thermal fluid, steam, or direct fire heating integration, and modular ISO-framed mobility, it delivers a flexible, compliant solution for refineries, terminals, blending facilities, and remote energy sites worldwide. Why Choose TEC's Crude Oil & HFO Storage Tank?

Struggling with safe storage for heavy, viscous products?

What is a crude & HFO storage tank?

The Crude & HFO Storage Tank from TEC Container Solutions provides high-capacity, insulated static storage for crude oil, heavy fuel oils (HFO), and other high-viscosity products. Built with a double-walled, fully banded design, it ensures environmental protection while maintaining stable product temperatures even in harsh conditions.

What are oil tanks for storage of crude oil?

Oil tanks for storage of crude oil are industrial-grade containers designed to store large volumes of unrefined petroleum. These tanks serve as temporary holding spaces for crude oil before it undergoes processing or is distributed to refineries or shipping terminals.
