Is a 100W solar power station a good choice?

A new compact power station by an upcoming brand with bigtime battery experience. Our favorite aspect is the fast AC charging combined with >20ms UPS transfer time. The 100W solar charging matches the top brands. Although testing is limited and brand recognition still has a long way to come, this may be a real contender.

Can a solar power station be used as a generator?

However,using one effectively is a little more complicated than many people realize.

Technically,these units are electric power stations--giant battery packs,with the ports you need to plug in solar panels for charging. They can't actually harness solar power--and thus,act as a generator--unless you have both.

What makes a good power station?

The best power stations usually feature LiFePO4 batteries,also known as LFP or lithium iron phosphate. These can be rated for 3,000 charging cycles or more before having significant battery capacity degradation. Manufacturer warranty coverage is an essential consideration when selecting a power station to buy.
