# How much does solar panels cost in Hamburg Germany

How much does solar energy cost in Germany?

While people who harness wind power are given lower per kilo watt hour price, people who use solar energy are offered a higher price which encourages people to install solar panel systems on their roofs. According to Dr. Matthias Lang (2015), the average installation cost of PV in Germany has fallen to EUR1 to EUR2 per watt from EUR5.

Why are solar panels so expensive in Germany?

While Germany aims to be the top in the world in terms of solar energy production, the prices of solar panels have remained high due to its limited domestic supply unlike in Japan and the United States. This indicates that as long as Germany is able to double its production of solar panels, it will be able to improve its price even more.

What is the German solar battery storage price monitoring?

The German Solar Battery Storage Price Monitoring summarizes price data of the most important battery storage market segments. To that end, EuPD Research interviews 80 solar installation companies and summarizes developments in a price index. In addition, the following data is gathered in the German Solar Battery Storage Price Monitoring:
