
How to apply for battery cabinet manufacturer qualification

Do batteries need a certification?

Battery manufacturers and importers are often required to document the safety and quality of their products with a certificate issued by a third party testing authority. Proper certification demonstrates that batteries comply with applicable regulations and can be sold and imported in target markets.

What is a certified battery?

Proper certification demonstrates that batteries comply with applicable regulations and can be sold and imported in target markets. We offer testing services and certification according to IEC 60086-1 and IEC 60086-2 and to national rules and regulations.

What are the UL standards for batteries?

Below are the most applicable standards for products that incorporate batteries: 1. UL 2054-Standard for Household and Commercial Batteries This applies to general purpose batteries for personal and business devices. This evaluates battery safety for overcharging, short-circuits, drops, and certain environmental conditions. 2.
