How do I install the Ex fan?

The EX can be controlled by reducing voltage via 5-step speed regulator. Fan can be installed in any position by using preinstalled mounting brackets. In case of installation to the circular duct system we recommend to use dedicated connection kit (additional accessory).

How do I protect my Ex fan?

EX fans have integrated PTC (Positive Temperature Coefficient) protective circuits with external leads for connection to a motor protection device (separate accessory). We recommend to use UEK230E motor protection, certified according to ATEX directive 2014/34/EU. The EX can be controlled by reducing voltage via 5-step speed regulator.

What is a ATEX rated AC fan?

The fan combines a compact design highly resistant to environmental stressors with a reliable ATEX rated AC motor. EX fan supplied with preinstalled mounting brackets and premounted terminal box which simplifies installation process on site. Connection kit (accessory) allows to simplify connection to the standard circular ducts.

What are ex fans?

EX fans are equipped with voltage controllable, explosion proof AC motors, approved by ATEX. Motor has an integrated cooling impeller. EX fans have integrated PTC (Positive Temperature Coefficient) protective circuits with external leads for connection to a motor protection device (separate accessory).
