Is it good to install solar panels at home to generate electricity

Is a home solar energy system a good option?
A home solar energy system is one of the most popular and efficient alternatives to traditional power sources. Solar panels have many environmental benefits and can save homeowners money over the long term. While costs have decreased recently,installing and maintaining solar panels can still be expensive.

Are solar panels a good choice for your home?
Homes that have energy usage in excess of 500 kilowatt hours (kWH) per month are usually excellent candidates for solar panels. If the solar panel system produces excess energy, or more energy than the home uses, homeowners can sell the extra energy output to the local utility company each month.

Why should you add solar panels to your home?
Adding solar panels improves the energy performanceof your home,too,and can boost your energy perfomance certificate (EPC) rating. Live more sustainably: get our free monthly Sustainability newsletter to make eco-friendly changes for you,your home and the planet

Should you install solar?
"It depends on what is motivating the household to make the decision to [install] solar," Becca Jones-Albertus, director of the US Department of Energy Solar Energy Technologies Office, told CNET. If you"re looking to be 100% energy independent or live off the grid, solar could be a good way to reach those goals.
