
Is the power cabinet a main device of the base station

What is a base station power cabinet?

The base station power cabinet is a key equipment ensuring continuous power supply to base station devices, with LLVD (Load Low Voltage Disconnect) and BLVD (Battery Low Voltage Disconnect) being two important protection mechanisms in the power cabinet.

What is a radio cabinet?

The cabinet houses critical components like main base station equipment, transmission equipment, power supply systems, and battery banks. Meanwhile, the pole serves as a mounting point for antennas, Remote Radio Units (RRUs), and other equipment, often resembling a "candied hawthorn stick" in its configuration.

What is a base station power system?

The base station power system serves as a continuous "blood supply pump station," responsible for AC/DC conversion, filtering, voltage stabilization, and backup power. Its purpose is to ensure the uninterrupted operation of base station equipment.

What is the main base station equipment connection diagram?
