
Kuwait power storage vehicle wholesale

Is Kuwait facing a changing energy world?

Kuwait, like all oil-producing countries, is facing a changing energy world today. Shifting supply, demand and technology trends have ushered in an energy world where oil-price volatility and market uncertainty are the defining features.

Why is Kuwait releasing a business-as-usual energy analysis & predictions?

With valuable support from the General Secretariat of the Supreme Council for Planning and Development, Kuwait is releasing its first ever economy-wide, in-depth energy analysis and predictions. In the Business-as-Usual case presented here, only current policies and plans are considered to have an impact on the projections.

Does Kuwait need solar power in 2035?

Despite some progress in supporting solar generation, in the Business-as-Usual Case, the share of renewables in total primary energy demand remains low in 2035, only 3%. Electricity generation capacity in Kuwait increases by over 13.2 gigawatts (GW) over the Outlook period, reaching 32 GW in 2035, a 70% increase over capacity in 2018.

How much oil does Kuwait need per capita?

However, due to the absence of efforts to check rapid growth in oil demand in the transport sector, per capita energy demand in Kuwait continues to rise over the projection period, reaching 9.2 tonnes of oil equivalent per capita in 2035.
