# Long-term energy storage container for drone stations

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

Are long-duration energy-storage technologies a stabilizer for new power systems?

Citation: Han M., Zheng K., Hu H., et al. (2025). Long-duration energy-storage technologies: A stabilizer for new power systems. *The Innovation Energy* 2:100077. Against the backdrop of realizing the target of "carbon peak and carbon neutrality", renewable energy sources such as wind and solar power have developed rapidly.

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
