
New energy storage projects in Eastern Europe

How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

What is the largest energy storage project in Europe?

Particularly noteworthy is the ambitious project in Alfeld (Lower Saxony), which is considered the largest approved storage project in Europe with a performance of 137.5 megawatts and a storage capacity of 275 megawatt hours.

Why is energy storage important in the EU?

The European Union has created a comprehensive regulatory framework in recent years to promote the development and use of energy storage technologies. A central element of this framework is the recognition of energy storage as an independent component of the energy system in the EU electricity market directive.

StarCharge is advancing its European expansion with the signing of a 500-MWh order for its energy storage system (ESS) technology with US renewable energy investor ...

International energy consultancy Wood Mackenzie has released groundbreaking research showing Europe's battery energy storage system (BESS) market is experiencing ...

DTEK Secures Record Financing for One of Eastern Europe's Largest Energy Storage Projects DTEK - the largest private investor in Ukraine's energy sector - has reached ...

Slovakia Solar News Eastern Europe has seen rapid progress in energy storage, with notable projects in Poland and Romania using Lithium batteries, a leading Chinese ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking installations, and bringing ...

Europe's energy storage at a glance, efficient and future-oriented. A comprehensive inventory of energy storage solutions. Data and facts for experts easily ...
