
Ottawa solar container lithium battery Repair Site

Why should you install battery storage in your solar system?

By integrating battery storage into your solar system, you can harness more of the energy you generate and enjoy reliable backup power during grid outages. LB Electric specializes in the installation of solar battery storage systems for homeowners in Ottawa and surrounding areas.

What is a lithium-ion battery energy storage system?

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project.

How do battery energy storage systems work?

Battery energy storage systems store electricity generated from renewable energy sources, such as solar and wind. They work to capture excess power during low-demand periods, so your home enjoys a reliable supply during power outages or peak demand times.

Are solar and battery storage a distributed energy resource?

Solar and battery storage are considered a Distributed Energy Resource, or DER. This refers to small-scale power generation and storage systems that are 'distributed', meaning they are spread out closer to where the energy is needed, rather than relying on one large power source.
