What is a string inverter?

String inverters are standard centralized inverters. Usually, a majority of small solar systems use string inverters or "centralized" inverters. In a solar PV system that comes with a string inverter, all the solar panels are connected together into "strings."

What are the different types of solar inverters?

There are mainly three types of solar inverters -- string inverters, micro-inverters, and power optimizers. All these inverters have a different system. However, they have the same function, which is collecting DC power from batteries and convert into AC, though with different levels of efficiency.
