# Record of wind solar and energy storage construction

How many solar and wind projects are built in China?

Almost three-quarters of all solar and wind power projects being built globally are in China, says a new report that highlights the country's rapid expansion of renewable energy sources.

Is China setting a record in solar and wind energy installations?

China is setting unprecedented records in solar and wind energy installations, achieving monumental growth in May 2025.

How many GW of solar & wind power are there in China?

China continues to install solar and wind power at a record pace, with 1.3 TW of utility-scale solar and wind capacity in development, of which 510 GW is under construction, according to a report from Global Energy Monitor (GEM). Ningxia wind farm using Goldwind turbines. Author: Land Rover Our Planet.

Did China's Wind and solar capacity exceed its thermal capacity?

The report notes that, according to the National Energy Administration (NEA), in the first quarter of 2025, China's wind and solar capacity exceeded its thermal capacity for the first time, providing nearly 23% of the country's electricity consumption, up from about 18% in the first quarter of 2024.

China continues to install solar and wind power at a record pace, with 1.3 TW of utility-scale solar and wind capacity in development, of which 510 GW is under construction, ...

Hydropower accounted for 436 million kilowatts, wind power for 521 million kilowatts, solar power for 887 million kilowatts, and biomass power for 46 million kilowatts. ...

China is setting unprecedented records in solar and wind energy installations, achieving monumental growth in May 2025. During this month, the country added 93 gigawatts ...

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country added 93 gigawatts of solar capacity, ...

In this week's Caixin energy wrap, we analyze China's biggest climate and energy news on policy, industry, projects and more: o Wind and solar break output record o Hybrid ...

China has once again made headlines for breaking its own records in the installation of new solar and wind power capacity. The National Energy Administration (NEA) ...

GEM's Global Wind Power Tracker has documented a 51 GW wind capacity increase since 2023 - this growth itself exceeds the total operating capacity of any country, ...

Almost three-quarters of all solar and wind power projects being built globally are in China, says a new report that highlights the country's rapid expansion of renewable energy ...

---

China's swift and unprecedented expansion in renewable energy, marked by record-breaking solar and wind installations, positions the nation as a formidable leader in the global ...
