# Romanian outdoor energy storage investment

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

How is Romania transforming the European energy landscape?

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date.

How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicesti in Ilt county, west of Bucharest. R. Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Floresti, Cluj county, which is expected to be operational by the end of 2025.

Jos&#233; Garza, CEO of Premier Energy Group, commented: "Battery storage is becoming a fundamental component of modern electricity systems, particularly in markets with ...

Romania has commissioned its largest battery energy storage system (BESS) to date: a 200 MW / 400 MWh project in Cluj County, developed by private investor Nova Power & ...

The total value of these investments exceeds 350 million euros. The Minister of Energy, Bogdan Ivan, emphasized the importance of energy storage for reducing imbalances in the system and ...

On November 21, 2024, the Romanian government, led by Prime Minister Marcel Ciolacu, announced a series of significant energy initiatives, including a EUR150 million fund for local firms ...

Nova Power & Gas, part of the E-INFRA group, has announced the commercial operation of Romania's largest battery energy storage facility, with a capacity of 200 MW and ...

The largest battery energy storage system (BESS) to date in Romania, with a capacity of 200 MW/400 MWh, has been commissioned in Cluj County by the private investor ...

---

Nova Power & Gas is currently the national leader in battery storage capacity, with 240 MWh already operational. The company continues to expand its investment portfolio, ...

" [The Eurowind Energy] contract marks the most significant storage project in our portfolio and consolidates the position of our Renewable EPC by Allview division as a key ...
