
Small Solar Power Generation System in Montenegro

How much solar power does Montenegro have?

Montenegro had installed solar power capacity of just 6 MW at the end of 2020. The country's solar power capacity is significantly smaller than the electrical power demand, which is currently met by the 225 MW Pljevlja thermal power plant in the north of Montenegro and two large hydropower plants, at Perucica (307 MW) and Piva (363 MW).

Is Montenegro a leader in rooftop solar energy?

In recent years, Montenegro, a small country on the Adriatic coast, has become an unexpected leader in rooftop solar energy. With more than 2,000 hours of sunshine per year, the country's natural potential has always been evident, but innovative policy design has truly driven adoption.

Where is electricity produced in Montenegro?

The majority of electricity in Montenegro is primarily produced at the Pljevlja coal-fired Thermal Power Plant, the Perucica, and the Piva Hydro Plants. The Montenegrin state-owned Electrical Power Company's (EPCG) core activity is electricity generation, transmission, distribution, and supply.

Will Montenegro's rooftop photovoltaics transform Red III?

Montenegro's nationwide rollout of rooftop photovoltaics, with thousands of prosumers integrated into the grid, illustrates precisely the kind of transformation envisaged in RED III. By early 2025, the rooftop capacity had approached 70 MW, with projections pointing to 100 MW by the end of the year.

A Strategic Move for Montenegro's Energy Future with the Montenegro solar plant While a 5 MW plant might seem modest compared to larger installations across Europe, its ...

With small rooftop solar systems of an overall 70 MW already online, Montenegro is a leader in the region in the development of the prosumer concept, Bulatovic claimed and ...

Crucially, it also streamlines permitting for rooftop photovoltaics (PV), recognising these systems as the fastest and least disruptive way to expand capacity [6]. Montenegro's ...

The utility-scale solar PV plants and energy storage in development will help Montenegro alleviate the strains of the energy crisis, while reversing decades of neglect and lack of investment in ...
