# Solar road power system in Gothenburg Sweden

How much solar power does Gothenburg have?

Seasonal solar PV output for Latitude: 57.7065, Longitude: 11.967 (Gothenburg, Sweden), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 6.05kWh/day in Summer.

Why is Sweden developing an electric road?

To address this, Sweden is developing an infrastructure that supports electric vehicles (EVs) and investing in electric vehicle incentives, carbon capture technologies, and renewable energy like wind and solar power. The electric road aims to solve a major challenge for EV adoption-- charging infrastructure.

Will Sweden build the world's first permanent electric road?

In a pioneering move that could revolutionize the way we think about electric vehicles, Sweden is constructing the world's first permanent electric road. Unlike traditional electric vehicle (EV) charging stations, this electric road will allow vehicles to charge while driving, using cutting-edge conductive or inductive technology.

How will a new electric road help Sweden achieve net-zero emissions?

Unlike traditional electric vehicle (EV) charging stations, this electric road will allow vehicles to charge while driving, using cutting-edge conductive or inductive technology. This ambitious project is not just about technological advancement; it is a crucial step toward Sweden's goal of achieving net-zero emissions by 2045.

1 Division of Energy Technology, Department of Space, Earth and Environment, Chalmers University of Technology, Gothenburg, Sweden 2 Fraunhofer Institute for Energy ...

Sweden is taking a bold step toward sustainable transportation with the construction of the world's first permanent electric road. This innovative project will allow ...

Next Steps for Sweden's Electric Road Alongside movable arm attachments to charge on electric rails -- also called ground-level power -- there are overhead wires and ...

Gothenburg is Sweden's second-largest city, with a population of over one million people. The city has set a goal to become climate-neutral by 2030, and solar energy plays a significant role in ...

This project is located in an ordinary residential area in Gothenburg, Sweden. It explores the potential of photovoltaic (PV) technology in the high-latitude regions of Northern Europe, ...

Gothenburg's ambition to achieve 100% renewable energy by 2030 is indeed bold and impressive. Here are some aspects of their plan that make it noteworthy: Focus on district ...
