
Solibro thin film solar modules

Why should you choose Solibro thin-film modules?

module performance. YOUR ADVANTAGES More Yield: Solibro thin-film modules generate a significantly higher energy-yield than competitor modules of same nominal power. You profit from our strict positive-sorting policy and the CIGS light-soaking effect, which further increases the module performance after an ini

Who makes CIGS thin-film modules?

about Solibro GmbH Solibro GmbH is one of the world's leading manufacturers of CIGS thin-film modules, with a production capacity of 145 MW. Solibro has headquarters in Thalheim, Germany and a research site in Uppsala, Sweden, both of which work to develop trailblazing solutions for the company's CIGS products.

Why is thin-film technology important for flexible solar cells?

shorter energy payback times. Furthermore, thin-film technology allows the creation of flexible solar cells Figure 1. Shockley-Queisser limit (accounting for radiative recombination) for single-junction solar cells under an AM1.5G spectrum. Also shown are selected record efficiencies for different monocrystalline (c-) and polycry

What certifications does Solibro have?

Certification: ISO 9001:2008, ISO 14001:2009, about Solibro GmbH Solibro GmbH is one of the world's leading manufacturers of CIGS thin-film modules, with a production capacity of 145 MW.

The uniform black Solibro thin film module is now even more powerful! Thanks to ongoing integration of our world-record-breaking CIGS technology into our production, Solibro modules ...

ovskite thin-film solar cells. In this paper the key breakthroughs in CIGS thin-film technology are reviewed and the scope for further performance improvements by analysing ...

Why Solibro's CIGS Technology Turns Heads Picture solar panels so thin they could double as roof shingles, yet powerful enough to generate electricity on cloudy days. That's the magic of ...

More Yield: Solibro thin-film modules generate a significantly higher energy-yield than competitor modules of same nominal power. You profit from our strict positive-sorting policy and the CIGS ...
