
Uninterruptible power supply costs in the Czech Republic

What are end-customer electricity bills in the Czech Republic?

End-customer electricity bills in the Czech Republic include a non-regulated "energy" price plus several regulated fees and taxes. In practice the bill breaks down into: Commodity price (silová elektrina): The base price of electricity per kWh (non-regulated).

How much power does the Czech Republic produce in 2024?

In 2024 Czech generators produced about 68.7TWh. Nuclear power supplied roughly 40-41% of that (?28TWh) - the single largest source. Coal-fired plants (mainly lignite) supplied about 33-34% (?23.7TWh). Renewables are a smaller but growing share. Photovoltaics alone reached record output (~3.9TWh, about 5.7% of generation in 2024).

What are the main sources of power in the Czech Republic?

The Czech power sector remains dominated by nuclear and coal. In 2024 Czech generators produced about 68.7TWh. Nuclear power supplied roughly 40-41% of that (?28TWh) - the single largest source. Coal-fired plants (mainly lignite) supplied about 33-34% (?23.7TWh). Renewables are a smaller but growing share.

Are dynamic tariffs legal in the Czech Republic?

As of 2024-25, dynamic tariffs are legally allowed but effectively only for customers with smart meters (initially large consumers, with smart meter rollout extending to >6MWh/year users from 2025). Several Czech electricity suppliers now offer dynamic or time-variable tariffs.
