
Victoria Energy Storage Equipment Transformation Plan

How many energy storage projects are there in western Victoria?

In March 2018, 2 projects in Western Victoria were chosen to be part of The Energy Storage Initiative - one in Ballarat and one in Gannawarra. Construction for the Ballarat and Gannawarra Energy Storage Systems was completed in late 2018. Both batteries began operating over the summer of 2018 and 2019.

How many large-scale storage systems does Victoria have?

Victoria has 12 commissioned large-scale storage systems and 3 in commissioning - with a total output capacity of 1028 MW and storage capacity of more than 1.7 GWh. Storage capacity = how much total energy is stored in each battery. Output capacity = how much energy a battery can provide at a given time.

What will Victoria's energy storage goals mean for electricity prices?

This will support the integration of more renewable energy into Victoria's electricity network and put downward pressure on power prices. Victoria previously established energy storage targets of at least 2.6GW of energy storage capacity by 2030 and at least 6.3GW by 2035. At the time, it was dubbed as one of the most ambitious targets globally.

Why is Victoria a good place to store batteries?

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient.

Victoria, Australia, is now home to a groundbreaking energy storage development that is set to redefine the landscape of renewable energy. The installation of a massive \$450 ...

The rules of the renewable energy auction, which is seeking 5 GW of NEM-connected clean power generation capacity, specifically exclude solar-plus-storage projects - ...

Planning approval includes conditions to manage bushfire risk, noise, and visual impacts - providing investors certainty around project delivery and long-term operations. ...

The Australian Capacity Investment Scheme (CIS) is set to bolster energy storage capabilities in Victoria and South Australia with support for six new large-scale battery ...

The government has pledged greater fiscal and financial support for the industrial equipment upgrades. There will be stronger preferential tax policies for equipment for energy ...

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant in the state's ...

Victoria's clean energy transition is accelerating with the approval of a \$453 million Battery

Energy Storage System (BESS) in north-east Victoria, backed by leading Chinese firm ...

Latrobe Valley, Victoria - EnergyAustralia has today marked a major milestone with the official turning of the sod for the 350 MW Wooreen Energy Storage System (WESS) in ...
