How to choose an inverter for a house?

When choosing an inverter for a house, you should consider its size, type, and potential features. Two major types of inverters exist in the market: modified sine wave and pure sine wave. Pure sine wave inverters are expensive but they can deliver a reliable and consistent power supply to AC appliances, thereby maintaining their safety.

What is a good inverter capacity for a house?

For houses, it is usually taken as 0.7. So, inverter capacity (VA) = Total power requirement (Watt) \times Power Factor Using the above example: Inverter capacity = 430 \times 0.7 = 614 VA So, you must look for an inverter of around 650 VA or a little more. It is always better to keep some margin to avoid overload.
